Wastes Disposal Location: Soils will be taken to the LMS landfill. Fluids will be taken to the Peterson battery.

Agencies Involved: BLM

Updates

Date: 10/16/2015 **Status:** Awaiting Documentation

Author: Martin, Russell

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

New injection line is being installed over a 6-mile stretch, and personnel are finding multiple old lines that were not marked or located as they install the line. Old lines appear to be a mix of types; some are empty, but some still contain fluid. Excavation trench appears to be catching all fluid released in these events. Discussion with responsible party to combine all reported events for this project into one summary report detailing line location procedures beforehand, as well as cleanup procedures afterward.
